

Why Smart-device application for Education?

The traditional education system is based on reading, writing and arithmetic. It takes place in a classroom using textbooks containing limited information. Whereas smart education, utilizing digital textbooks with interactive contents and the Internet, expands the classroom to museums, cultural relics, parks and any other places outside the classroom.

Education

Education is the key to unlock the unlimited opportunities. Ilmasoft is providing smart solutions for education sector. We are determined to provide the fun tools for learning, with the believe that all children are smart but have different pace for learning and children learn best when having fun.

Educational activities that were administered only during limited school hours can be engaged in whenever students want, through online classes and cloud computing services.

Educational Apps present an opportunity to allow students to learn in new and engaging ways, and opens possibilities that were inconceivable even a few years ago
